

Rendering Host Options Assessment

Selecting the right solution for hosting for your new website head in a composable architecture is crucial. Early planning for how your Sitecore solution will build, deploy, and perform in a secure, interconnected ecosystem ensures you can operate quickly and efficiently.

This Rendering Host Options Assessment offers a feature-based comparison between Dataweavers Platform Operations™, SaaS competitors, and a DIY approach.

Feature Area		Dataweavers	Vercel/Netlify	DIY
Tech	JAM Stack Support	✓	✓	✓
	Pure Static Apps	✓	✓	✓ (additional \$\$\$)
	API Hosting	✓	✗	✓ (additional \$\$\$)
	Platform Support	Single Channel	✗ Minimum 2 Vendors	✗ 3 teams
Build and Deploy	Dev Ops	✓	Partial (only head)	✓ (months)
	Site Preview	✓	✓	✗
	Orchestration FE and BE Changes	✓	✗	✗
	End to End Starter Kit	✓	✗	✗

	Tuned Sitecore Caching	✓	✗	✗
Security	BoT, DDOS, WAF	✓	Partial (Only head)	✓ (additional \$\$\$)
	Compliance	✓	Partial (Only head)	✓ (additional \$\$\$)
	Monitoring	✓	Partial (Only head)	✓ (additional \$\$\$)

A Platform Operations Approach

Dataweavers offers a comprehensive solution tailored to customers' needs, focusing on efficient management and automation of technical operations through our Platform Operations™ Composable product.

Benefits for your business

Key Advantages of taking a Platform Operations approach:

Increased Brand Value

A lightning-fast site will impress your customers and set you apart from the pack. Optimised for Sitecore Headless solutions, our platform outperforms rival offerings.

Improved Total Cost of Ownership

A guaranteed better Total Cost of Ownership (TCO) that delivers exceptional results, driven by our focus on the end-to-end solution.

Transparent Compliance

Aligned with enterprise controls and within your Azure Tenant, we provide the best of both worlds – a SaaSified experience that your security team will get on board with.

Time-to-Market

Architecture best practices are taken care of. Just start building and save up to 30% on development startup time.

Strong Reputation

With globally replicated advanced security measures, from browser to backend, your reputation will always be intact.

Ease of Use

With one support channel for your frontend, backend, all the way to XM Cloud or XM, solving challenges is easy.

Velocity

Move as fast as marketing. Proven SLA backed Zero-Down-Time-Pipelines orchestrate frontend, backend, and XMCloud release, ensuring you can release comfortably at any time, on any day.

Exceptional Digital Outcomes

Focus on achieving your outcomes 100% of the time, allowing Dataweavers to take care of end-to-end platform operations.

About Dataweavers

Dataweavers Platform-as-a-Service (PaaS) leverages code to unify operations, enhance collaboration, and accelerate project delivery for a seamless SaaS (Software as a Service) experience.

With a purpose-built approach, Dataweavers simplifies operational management, prioritizing time-to-value through automation and comprehensive support for both legacy and modern applications, ensuring reliability and compliance.
